EXECUTIVE SUMMARY

What this audit found

> Overpaying an estimated $2,245 vs. benchmark CPM efficiency at your current impression volume. is the single most important number in this audit.

Lead issue: Meta CPM is critically above the B2B SaaS industry benchmark. Your Meta CPM is **$140.13**, which exceeds the danger threshold of **$60** for B2B SaaS accounts. You are overpaying for impressions by an estimated **$2,245** compared to benchmark level buying (**$20** CPM target).

Why it matters: Findings are ranked by recoverable spend/revenue, confidence, and implementation ease, not by severity label alone.

Next move: Fix first, then re run the audit after the next full reporting cycle to measure the delta.

THIS PERIOD	PER QUARTER	ANNUALIZED
2,245	**≈ 6,735**	**≈ 26,940**
identified opportunity	if the pattern persists	directional projection

Projection multiplies the measured period impact and assumes spend and performance patterns remain stable.

01

HEALTH SCORE

Where the 77 comes from

The score breakdown shows which account areas are healthy and which areas generated findings.

Scores below 85 are treated as pressure points.

02

MONEY MAP

Where the recoverable spend is concentrated

Only findings with measured financial evidence appear here. Structural risks stay out of this chart unless the engine can quantify them.

EVIDENCE	VALUE
Meta cpm is critically above the b2 b saa s industry benchmark	$2,245

03

FINDINGS

2 findings, ranked by impact

Findings are ordered by measured recoverable spend or revenue first, then confidence, then ease of implementation.

#	FINDING	SEVERITY	IMPACT
1	Meta CPM is critically above the B2B SaaS industry benchmark	High	USD 2,245 recoverable
2	Paused Meta ad sets still have budgets assigned Str 002	Medium	Business risk

Impact shows measured dollars only when the rule evidence supports it.

04

EVIDENCE

The evidence, finding by finding

Each finding shows what is happening, the business impact, supporting evidence, confidence, and the recommended fix.

High Confidence: High Ease: Medium

Meta CPM is critically above the B2B SaaS industry benchmark

What is happening: Your Meta CPM is **$140.13**, which exceeds the danger threshold of **$60** for B2B SaaS accounts. You are overpaying for impressions by an estimated **$2,245** compared to benchmark level buying (**$20** CPM target).

Why it is happening: the rule engine flagged from the account data. Use the evidence below to confirm the driver before changing budgets.

Estimated business impact: Overpaying an estimated **$2,245** vs. benchmark CPM efficiency at your current impression volume.

Recoverable 85.8% Remaining 14.

$2,245 recoverable within the affected spend pool.

EVIDENCE	VALUE
Recoverable spend	USD 2,245
Total spend	USD 2,618
Impressions	18,685

Expected outcome after fixing: spend should shift away from the flagged weakness and performance should move closer to the account baseline.

> **What this means for you: fixing this can recover $2,245 in the next comparable period.**

1. Broaden targeting to access cheaper inventory — narrow audiences drive CPM spikes.
2. Test interest based and lookalike audiences alongside retargeting (retargeting pools carry premium CPMs).
3. Review campaign objective — conversion objectives have higher CPMs than traffic or reach objectives.
4. Audit ad set overlap — overlapping audiences bid against each other and inflate CPM.

Medium Confidence: Medium Ease: Easy

Paused Meta ad sets still have budgets assigned

What is happening: Paused ad sets with daily/lifetime budgets often confuse pacing reviews and may be re enabled accidentally with stale targeting.

Why it is happening: the rule engine flagged Str 002 from the account data. Use the evidence below to confirm the driver before changing budgets.

Estimated business impact: Account hygiene and budget pacing decisions degrade.

EVIDENCE	VALUE
Paused ad sets with budget	USD 1

Expected outcome after fixing: spend should shift away from the flagged weakness and performance should move closer to the account baseline.

> **What this means for you: fixing this removes account drag before it turns into measurable waste.**

1. Archive paused ad sets you don't intend to relaunch.
2. For ad sets reserved for relaunch, document why budget is retained.

METHOD

Benchmarks, confidence & assumptions

- **Numbers.** Every figure comes from deterministic rule evidence or normalized account data. The renderer does not invent chart values.
- **Benchmarks.** Peer, historical, or industry comparisons are shown only where available.
- **Confidence.** Confidence labels are derived from rule evidence, severity, and sample notes rather than model guesswork.
