Completed May 9, 2026

Health score 89/100	Findings 2	Readiness LIMITED
-------------------------------	----------------------	-----------------------------

Executive Summary

This deterministic audit reviewed Meta using validated upload data and intake answers.

Upload readiness is limited: the audit ran with partial data and should be treated as directional until missing reports are uploaded.

The current health score is 89/100. The engine found 2 issue(s), with 0 critical and 0 high-priority item(s).

Uploaded data currently covers 1 file(s), 1 row(s), and 76 in detected spend.

Top Priorities

1. Meta audit is running with incomplete report coverage
MEDIUM META DATA-003

Some rules may be skipped or less confident until all required reports are uploaded.

2. Meta audit has limited row coverage

LOW META DATA-002

Recommendations should be treated as directional.

Quick Wins

Meta audit is running with incomplete report coverage

- Upload the missing reports listed in the readiness checklist.
- Run the audit again after the checklist is complete.

Meta audit has limited row coverage

- Upload additional report types or a fuller export when available.

Full Issue List

MEDIUM - Meta audit is running with incomplete report coverage

DATA-003 | META | Attribution & Reporting

The audit can run in limited mode, but full confidence requires all required platform exports.

Impact: Some rules may be skipped or less confident until all required reports are uploaded.

Fix steps

- Upload the missing reports listed in the readiness checklist.
- Run the audit again after the checklist is complete.

LOW - Meta audit has limited row coverage

DATA-002 | META | Attribution & Reporting

The audit can run, but findings are less confident with very few rows.

Impact: Recommendations should be treated as directional.

Fix steps

- Upload additional report types or a fuller export when available.
