Health score 76/100	Findings 3	Readiness FULL
-------------------------------	----------------------	--------------------------

Executive Summary

This deterministic audit reviewed Google using live API data and intake answers.

Data coverage is complete: all required platform reports were fetched via OAuth API.

The current health score is 76/100. The engine found 3 issue(s), with 0 critical and 0 high-priority item(s).

Data covers 1 source(s), 1355 row(s), and 44,227 in detected spend.

Top Priorities

1. Many active Google keywords are getting zero impressions
MEDIUM GOOGLE KW-010

Zero-impression active keywords inflate account clutter, mask Quality Score problems, and can indicate disapproved ads that need immediate attention.

2. No Google brand campaign detected — brand traffic is unprotected

MEDIUM GOOGLE OPP-001

Unprotected brand searches allow competitors to capture your highest-intent traffic at no cost to you.

3. The TUESDAY dayOfWeek segment is wasting PKR 3,213

MEDIUM GOOGLE SEG-WASTE-001

PKR 3,213 in this segment is recoverable by reducing or excluding it. Reallocate to segments performing at or below the PKR 144 baseline CPA.

Quick Wins

Many active Google keywords are getting zero impressions

- Check Google Ads status column for 'Below first page bid', 'Low search volume', or 'Disapproved'.
- Pause keywords labelled 'Low search volume' — they consume account resources without contributing.
- For keywords showing 'Below first page bid', evaluate whether raising the bid is justified by relevance.
- Remove duplicate keywords that overlap with better-performing broad or phrase match versions.

No Google brand campaign detected — brand traffic is unprotected

- Create a dedicated branded keyword campaign with exact and phrase match variants of your brand name.
- Set bids high enough to maintain brand impression share above 90%.
- Add competitor brand terms to a separate observation campaign to monitor intent traffic.

The TUESDAY dayOfWeek segment is wasting PKR 3,213

- Review the TUESDAY dayOfWeek segment in the platform UI to confirm the underperformance.
- Exclude or down-bid the TUESDAY segment after confirming the trend on the next full reporting cycle.
- Reallocate the recovered budget to segments at or below baseline CPA.

Full Issue List

MEDIUM - Many active Google keywords are getting zero impressions

KW-010 | GOOGLE | Keyword Strategy

1168 active keyword(s) (100% of active keywords) received zero impressions in the data period. Common causes: bid below first page, low search volume, disapproval, or keyword-level policy restrictions.

Impact: Zero-impression active keywords inflate account clutter, mask Quality Score problems, and can indicate disapproved ads that need immediate attention.

Fix steps

- Check Google Ads status column for 'Below first page bid', 'Low search volume', or 'Disapproved'.
- Pause keywords labelled 'Low search volume' — they consume account resources without contributing.
- For keywords showing 'Below first page bid', evaluate whether raising the bid is justified by relevance.
- Remove duplicate keywords that overlap with better-performing broad or phrase match versions.

MEDIUM - No Google brand campaign detected — brand traffic is unprotected

OPP-001 | GOOGLE | Campaign Structure

None of your 27 Google campaign(s) appear to target branded keywords. Without a dedicated brand campaign, competitors can bid on your brand name and capture high-intent searches that should convert at a fraction of your non-brand CPA. Brand campaigns typically achieve 5–10× better CTR and ROAS than non-brand.

Impact: Unprotected brand searches allow competitors to capture your highest-intent traffic at no cost to you.

Fix steps

- Create a dedicated branded keyword campaign with exact and phrase match variants of your brand name.
- Set bids high enough to maintain brand impression share above 90%.
- Add competitor brand terms to a separate observation campaign to monitor intent traffic.

MEDIUM - The TUESDAY dayOfWeek segment is wasting PKR 3,213

SEG-WASTE-001 | GOOGLE | Audience & Attribution

The TUESDAY dayOfWeek segment runs at PKR 263 CPA vs a PKR 144 platform baseline — PKR 3,213 of that spend is excess cost above baseline efficiency.

Impact: PKR 3,213 in this segment is recoverable by reducing or excluding it. Reallocate to segments performing at or below the PKR 144 baseline CPA.

Fix steps

- Review the TUESDAY dayOfWeek segment in the platform UI to confirm the underperformance.
- Exclude or down-bid the TUESDAY segment after confirming the trend on the next full reporting cycle.
- Reallocate the recovered budget to segments at or below baseline CPA.
