EXECUTIVE SUMMARY

What this audit found

PKR 6,585 of Display | PK | Signals | Tightened | 6/8's spend is going to an audience that converts elsewhere but not here. Removing it from Display | PK | Signals | Tightened | 6/8 and rebuilding a campaign specific audience recovers that spend. is the single most important number in this audit.

Lead issue: Audience BD New Audience | 6/6 is mis applied — strong in Display | BD | Signals | Tightened | 6/6, broken in Display | PK | Signals | Tightened | 6/8. The same audience segment (BD New Audience | 6/6) drives **PKR 85** CPA in Display | BD | Signals | Tightened | 6/6 but runs at **PKR 1,079** CPA in Display | PK | Signals | Tightened | 6/8 — 12.6× its **PKR 85** CPA in Display | BD | Signals | Tightened | 6/6. An audience trained on one campaign's converting users does not transfer to a different market or funnel — this is the classic cause of a campaign's CPA collapsing while its click through rate stays healthy.

Why it matters: Findings are ranked by leverage — the most damaging issue leads (severity and root cause gravity first, then confidence and recoverable spend), not simply the biggest dollar figure.

Next move: Start with the first issue in this report, then re run the audit after the next full reporting cycle to measure the delta.

THIS PERIOD	PER QUARTER	ANNUALIZED
6,585	≈ 19,755	≈ 79,020
identified opportunity	if the pattern persists	directional projection

Projection multiplies the measured period impact and assumes spend and performance patterns remain stable.

01

HEALTH SCORE

Where the 59 comes from

The score breakdown shows which account areas are healthy and which areas generated findings.

Scores below 85 are treated as pressure points.

02

ACCOUNT SCORECARD

The headline metrics, against target

Each account metric measured against its industry benchmark or your declared target, with a clear verdict — so every claim in this audit is anchored to a number you can check.

METRIC	VALUE	TARGET / BENCHMARK	STATUS
Total spend	PKR 89,604	— —	
Conversions	649	— —	
Click through rate	6.36%	≥ 2%	Strong
Avg cost per click	PKR 2.76	— —	
Cost per acquisition	PKR 138	PKR 40	245% over target

CPA target (PKR 40) from your intake; CTR benchmark for Lead Gen on Google Ads.

03

MONEY MAP

Where the recoverable spend is concentrated

Only findings with measured financial evidence appear here. Structural risks stay out of this chart unless the engine can quantify them.

Measured recoverable spend by finding.

04

FINDINGS

11 findings, ranked by impact

Findings are ordered by leverage — severity and root cause gravity first, then confidence, then recoverable spend.

#	FINDING	SEVERITY	IMPACT
1	Audience BD New Audience 6/6 is mis applied — strong in Display BD Signals Tightened 6/6, broken in Display PK Signals Tightened 6/8	Critical	PKR 6,585 recoverable
2	Google CPA is significantly above your declared target	Critical	Needs review
3	Google CPA varies sharply by campaign — Display PK Signals Tightened 6/8 runs 8.9× the account baseline	Critical	PKR 11,682 recoverable
4	Google CPA is over target — driven by weak post click conversion, not expensive clicks	High	PKR 40 recoverable
5	The Thursday day of week segment is wasting PKR 3,078	Medium	PKR 3,078 recoverable
6	Desktop on PK Display 6/16 spent PKR 338 with zero conversions	Medium	PKR 338 recoverable
7	Desktop on Display PK Signals Tightened 6/8 spent PKR 253 with zero conversions	Medium	PKR 253 recoverable
8	Display Ind Signals Tightened 6/7 is missing its Target CPA — paying PKR 141 against a PKR 95 target (49% over)	Medium	PKR 95 recoverable

Money impact is shown only when the account data supports a reliable estimate. Other rows are still important business risks.

05

CAMPAIGN PERFORMANCE

Every campaign, with a verdict

Each campaign's own numbers against the account baseline (cost per result **PKR 138**) — so the diagnosis is grounded in per campaign performance, not a blended average.

CAMPAIGN	SPEND	RESULTS	COST / RESULT	STATUS	VERDICT
Display BD 8/4 Broad No Tcpa (Old Proj)	PKR 29,587	199	PKR 149	Above avg	Converting, but above the account average — room to tighten.
Display BD Signals Tightened 6/6	PKR 23,164	271	PKR 85	At/below avg	At or below the account's average cost — protect and scale this one.
Display Ind Signals Tightened 6/7	PKR 18,648	132	PKR 141	Above avg	Converting, but above the account average — room to tighten.
Display PK Signals Tightened 6/8	PKR 9,781	8	PKR 1,223	8.9x baseline	Converting at 8.9× the account average — the main efficiency drag.
PK Display 6/16	PKR 6,043	22	PKR 275	Above avg	Converting, but above the account average — room to tighten.
Display bd 02/06 Broad No Tcpa	PKR 2,254	17	PKR 133	At/below avg	At or below the account's average cost — protect and scale this one.
Display Ind Signals Tightened 6/7 #2	PKR 127	0	—	Monitor	Limited data — monitor before acting.

Cost per result uses each campaign's own conversions; the verdict compares it to the account baseline.

06

CAMPAIGN DEEP DIVE

Top campaigns, scored

Each top spending campaign measured against its CTR benchmark and CPA target, with a verdict and its next move — the per campaign view a strategist works from.

Above avg PKR 29,587

Display | BD | 8/4 | Broad | No Tcra (Old Proj)

METRIC	VALUE	TARGET / BENCHMARK	STATUS
Spend	PKR 29,587	— —	
Conversions	199	— —	
Click through rate	6.56%	≥ 2%	Strong
Cost per result	PKR 149	vs PKR 40	272% over

Converting, but above the account average — room to tighten.

1. Above the account average — tighten targeting or add/lower a cost per result cap.
2. Compare its audience and placement mix against the best performing campaign.
3. Re evaluate next cycle and reallocate toward what converts.

At/below avg PKR 23,164

Display | BD | Signals | Tightened | 6/6

METRIC	VALUE	TARGET / BENCHMARK	STATUS
Spend	PKR 23,164	— —	
Conversions	271	— —	
Click through rate	5.98%	≥ 2%	Strong
Cost per result	PKR 85	vs PKR 40	114% over

At or below the account's average cost — protect and scale this one.

1. Protect this campaign — it is carrying the account's efficiency.
2. Scale budget in small increments (~20%) while cost per result holds.
3. Add a backup ad group or audience layer to de risk creative/audience fatigue.

Above avg PKR 18,648

Display | Ind | Signals | Tightened | 6/7

METRIC	VALUE	TARGET / BENCHMARK	STATUS
Spend	PKR 18,648	— —	
Conversions	132	— —	
Click through rate	5.76%	≥ 2%	Strong
Cost per result	PKR 141	vs PKR 40	253% over

Converting, but above the account average — room to tighten.

1. Above the account average — tighten targeting or add/lower a cost per result cap.
2. Compare its audience and placement mix against the best performing campaign.
3. Re evaluate next cycle and reallocate toward what converts.

07

EVIDENCE

The evidence, finding by finding

Each finding shows what is happening, the business impact, supporting evidence, confidence, and the recommended fix.

Audience BD New Audience | 6/6 is mis applied — strong in Display | BD | Signals | Tightened | 6/6, broken in Display | PK | Signals | Tightened | 6/8

What is happening: The same audience segment (BD New Audience | 6/6) drives **PKR 85** CPA in Display | BD | Signals | Tightened | 6/6 but runs at **PKR 1,079** CPA in Display | PK | Signals | Tightened | 6/8 — 12.6× its **PKR 85** CPA in Display | BD | Signals | Tightened | 6/6. An audience trained on one campaign's converting users does not transfer to a different market or funnel — this is the classic cause of a campaign's CPA collapsing while its click through rate stays healthy.

Why it is happening: The evidence below isolates the pattern in the account data. Confirm the specific driver — targeting, creative, bidding, or tracking — against these figures before changing budgets.

Estimated business impact: **PKR 6,585** of Display | PK | Signals | Tightened | 6/8's spend is going to an audience that converts elsewhere but not here. Removing it from Display | PK | Signals | Tightened | 6/8 and rebuilding a campaign specific audience recovers that spend.

EVIDENCE	VALUE
Confidence	High
Baseline cpa	PKR 138
Criterion id	2,488,177,887,755
Audience type	Custom audience
Multiple vs best	13

Expected outcome after fixing: spend should shift away from the flagged weakness and performance should move closer to the account baseline.

What this means for you: fixing this can recover **PKR 6,585 in the next comparable period.**

1. Remove audience BD New Audience | 6/6 from Display | PK | Signals | Tightened | 6/8 — it is a Display | BD | Signals | Tightened | 6/6 audience that does not map to this campaign's users.
2. Build a campaign specific audience for Display | PK | Signals | Tightened | 6/8 from its own market signals, then relearn on Maximize Conversions before adding a CPA target.
3. Keep BD New Audience | 6/6 running in Display | BD | Signals | Tightened | 6/6 where it performs, and isolate it from cross campaign overlap.

Google CPA is significantly above your declared target

What is happening: Your declared target CPA is **PKR 40**. The actual CPA in this .07 — 3.5× your goal. Every acquisition is costing far more than your business model planned for.

Why it is happening: The evidence below isolates the pattern in the account data. Confirm the specific driver — targeting, creative, bidding, or tracking — against these figures before changing budgets.

Estimated business impact: At 3.5× your target, the cost of inaction compounds with every dollar of additional spend.

METRIC	VALUE	TARGET / BENCHMARK	STATUS
Cost per acquisition	PKR 138	vs PKR 40	245% over

Expected outcome after fixing: spend should shift away from the flagged weakness and performance should move closer to the account baseline.

What this means for you: fixing this removes account drag before it turns into measurable waste.

1. Identify the top spending campaigns and ad sets with CPA furthest above target — pause or cap them first.
2. Review bidding strategy: check whether conversion volume is sufficient for stable smart bidding.
3. Audit the conversion event being optimised — confirm it matches the intended action.
4. Test landing page conversion rate improvements; ad side CPA is often constrained by post click performance.

Google CPA varies sharply by campaign — Display | PK | Signals | Tightened | 6/8 runs 8.9× the account baseline

What is happening: The account average CPA of **PKR 138** hides a wide spread across campaigns. Display | PK | Signals | Tightened | 6/8 runs at **PKR 1,223** CPA — 8.9× the **PKR 138** account baseline. By contrast, Display | BD | Signals | Tightened | 6/6 runs at **PKR 85** — at or below baseline. Treating the account as uniformly inefficient (an across the board cut) would damage the healthy campaign while leaving the real offender untouched. The primary driver is geographic: spend is leaking to Pakistan, which converts well below the account baseline — so correcting location targeting (set targeting to physical "Presence", and exclude Pakistan if it is outside your intended market) is the root cause fix, not an across the board campaign cut.

Why it is happening: The evidence below isolates the pattern in the account data. Confirm the specific driver — targeting, creative, bidding, or tracking — against these figures before changing budgets.

Estimated business impact: **PKR 11,682** is recoverable by bringing these 2 campaigns toward the **PKR 138** account baseline — without touching campaigns already at or below it.

EVIDENCE	VALUE
Confidence	Medium
Min sample passed	No

Expected outcome after fixing: spend should shift away from the flagged weakness and performance should move closer to the account baseline.

What this means for you: fixing this can recover **PKR 11,682** in the next comparable period.

1. Isolate Display | PK | Signals | Tightened | 6/8 and diagnose its CPA driver — audience/targeting, landing page, or bidding — before changing account wide settings.
2. Protect and consider scaling Display | BD | Signals | Tightened | 6/6 (**PKR 85** CPA); it is carrying the account.
3. Manage to per campaign CPA targets rather than a single blended account average.
4. Review location settings: set targeting to "Presence" (people in your target locations), not "Presence or interest".

Google CPA is over target — driven by weak post click conversion, not expensive clicks

What is happening: Actual CPA **PKR 138.07** vs target **PKR 40** (245.2% over target). Actual **CTR 6.36%** vs benchmark (warning **2%**, good **4.5%**). CPA is over target but CTR is at/above benchmark — the bottleneck is post click conversion (landing page, offer, or tracking), not click cost.

Why it is happening: The evidence below isolates the pattern in the account data. Confirm the specific driver — targeting, creative, bidding, or tracking — against these figures before changing budgets.

Estimated business impact: CPA is **245.2%** over your **PKR 40** target. Because CTR is healthy, the highest leverage fix is post click: landing page, offer, and conversion tracking — not bids or creative.

PKR 40 recoverable

METRIC	VALUE	TARGET / BENCHMARK	STATUS
Cost per acquisition	PKR 138	vs PKR 40	245% over
Recoverable spend	PKR 40	—	—
Confidence	High	—	—

Expected outcome after fixing: spend should shift away from the flagged weakness and performance should move closer to the account baseline.

What this means for you: fixing this can recover **PKR 40 in the next comparable period.**

1. Audit the landing page: load speed, message match, and friction in the conversion step.
2. Verify conversion tracking is firing correctly — under counting inflates CPA.
3. Test offer / Cta changes before increasing bids.

The Thursday day of week segment is wasting PKR 3,078

What is happening: The Thursday day of week segment runs at **PKR 180** CPA vs a **PKR 138** platform baseline — **PKR 3,078** of that spend is excess cost above baseline efficiency.

Why it is happening: This segment converts at a worse rate than the account baseline, so each result here costs more than it does elsewhere; the blended average hides the gap.

Estimated business impact: **PKR 3,078** in this segment is recoverable by reducing or excluding it. Reallocate to segments performing at or below the **PKR 138** baseline CPA.

PKR 3,078 recoverable

METRIC	VALUE	TARGET / BENCHMARK	STATUS
Cost per acquisition	PKR 180	vs PKR 138	31% over
Recoverable spend	PKR 3,078	— —	

Expected outcome after fixing: spend should shift away from the flagged weakness and performance should move closer to the account baseline.

What this means for you: fixing this can recover **PKR 3,078 in the next comparable period.**

1. Review the Thursday day of week segment in the platform UI to confirm the underperformance.
2. Exclude or down bid the Thursday segment after confirming the trend on the next full reporting cycle.
3. Reallocate the recovered budget to segments at or below baseline CPA.

Desktop on PK Display 6/16 spent PKR 338 with zero conversions

What is happening: Within PK Display 6/16, the desktop device generated 140 clicks and **PKR 338** in spend with zero conversions. A device bid modifier concentrates budget on the devices that actually convert.

Why it is happening: This segment is taking real spend and clicks but returning no conversions, while the rest of the account converts at baseline — spend is being allocated here without the performance to justify it.

Estimated business impact: **PKR 338** is recoverable by applying a **100%** desktop bid modifier on PK Display 6/16.

Recoverable 100%

PKR 338 recoverable within the affected spend pool.

EVIDENCE	VALUE
Device	Desktop
Reason	Zero conversions
Confidence	High
Campaign cpa	PKR 275
Min sample passed	Yes

Expected outcome after fixing: spend should shift away from the flagged weakness and performance should move closer to the account baseline.

What this means for you: fixing this can recover **PKR 338 in the next comparable period.**

1. In PK Display 6/16, set a **100%** (exclude) bid modifier on desktop.
2. Re check device CPA after 7–10 days and tune the modifier toward the campaign's blended CPA.
3. Reallocate the freed budget to the best converting device.

The phased plan — what to do, in order

This is your action plan, sequenced by leverage: start at Phase 1 this week (stop active waste), then tighten efficiency, then build durable structure. Each item shows the move, the effort, and what it recovers.

Phase 1 THIS WEEK

Stop the bleeding — fix what is actively wasting spend or blocking delivery right now.

1. **Audience BD New Audience | 6/6 is mis applied — strong in Display | BD | Signals | Tightened | 6/6, broken in Display | PK | Signals | Tightened | 6/8:** Remove audience BD New Audience | 6/6 from Display | PK | Signals | Tightened | 6/8 — it is a Display | BD | Signals | Tightened | 6/6 audience that does not map to this campaign's users. ~1 HOUR **PKR 6,585 recoverable**
2. **Google CPA is significantly above your declared target:** Identify the top spending campaigns and ad sets with CPA furthest above target — pause or cap them first. HALF DAY **Needs review**
3. **Google CPA varies sharply by campaign — Display | PK | Signals | Tightened | 6/8 runs 8.9× the account baseline:** Isolate Display | PK | Signals | Tightened | 6/8 and diagnose its CPA driver — audience/targeting, landing page, or bidding — before changing account wide settings. HALF DAY **PKR 11,682 recoverable**

Phase 2 WEEKS 2-4

Tighten efficiency — pull the high impact inefficiencies back toward target.

1. **Google CPA is over target — driven by weak post click conversion, not expensive clicks:** Audit the landing page: load speed, message match, and friction in the conversion step. TECHNICAL **PKR 40 recoverable**
2. **The Thursday day of week segment is wasting PKR 3,078:** Review the Thursday day of week segment in the platform UI to confirm the underperformance. ~1 HOUR **PKR 3,078 recoverable**
3. **desktop on PK Display 6/16 spent PKR 338 with zero conversions:** In PK Display 6/16, set a **100%** (exclude) bid modifier on desktop. ~1 HOUR **PKR 338 recoverable**
4. **desktop on Display | PK | Signals | Tightened | 6/8 spent PKR 253 with zero conversions:** In Display | PK | Signals | Tightened | 6/8, set a **100%** (exclude) bid modifier on desktop. ~1 HOUR **PKR 253 recoverable**
5. **Display | Ind | Signals | Tightened | 6/7 is missing its Target CPA — paying PKR 141 against a PKR 95 target (49% over):** Confirm the **PKR 95** target is realistic against this campaign's recent achieved CPA — raise it toward a reachable level if Google is under delivering to chase it. TECHNICAL **PKR 95 recoverable**

Phase 3 ONGOING

Structure & scale — clear hygiene risks and build durable account structure.

1. **No Google brand campaign detected — brand traffic is unprotected:** Create a dedicated branded keyword campaign with exact and phrase match variants of your brand name. ~1 HOUR **Brand risk**
2. **Many active Google keywords are getting zero impressions:** Check Google Ads status column for 'Below first page bid', 'Low search volume', or 'Disapproved'. HALF DAY **Account hygiene risk**
3. **7 active ads are rated Average Ad Strength on PKR 31,575 of spend:** Open the "NCs2 | 26 jan | to be continued" ad group and add headlines/descriptions until Ad Strength reaches Good or better (aim for 12–15 distinct headlines, 3–4 descriptions). ~1 HOUR **Needs review**

MT
