

The mobile app device segment is wasting PKR 7,687

PKR 7,687 in this segment is recoverable by reducing or excluding it. Reallocate to segments performing at or below the **PKR 336** baseline CPA. is the clearest quantified opportunity in this audit.

EXECUTIVE SUMMARY

What this audit found

PKR 7,687 in this segment is recoverable by reducing or excluding it. Reallocate to segments performing at or below the **PKR 336** baseline CPA. is the single most important number in this audit.

Lead issue: The mobile app device segment is wasting **PKR 7,687**. The mobile app device segment runs at **PKR 885** CPA vs a **PKR 336** platform baseline — **PKR 7,687** of that spend is excess cost above baseline efficiency.

Why it matters: Findings are ranked by leverage — the most damaging issue leads (severity and root cause gravity first, then confidence and recoverable spend), not simply the biggest dollar figure.

Next move: Start with the first issue in this report, then re run the audit after the next full reporting cycle to measure the delta.

THIS PERIOD 7,687 identified opportunity	PER QUARTER ≈ 23,061 if the pattern persists	ANNUALIZED ≈ 92,244 directional projection
---	---	---

Projection multiplies the measured period impact and assumes spend and performance patterns remain stable.

01

HEALTH SCORE

Where the 54 comes from

The score breakdown shows which account areas are healthy and which areas generated findings.

Scores below 85 are treated as pressure points.

02

MONEY MAP

Where the recoverable spend is concentrated

Only findings with measured financial evidence appear here. Structural risks stay out of this chart unless the engine can quantify them.

Measured recoverable spend by finding.

03

FINDINGS

5 findings, ranked by impact

Findings are ordered by leverage — severity and root cause gravity first, then confidence, then recoverable spend.

#	FINDING	SEVERITY	IMPACT
1	The mobile app device segment is wasting PKR 7,687	Critical	PKR 7,687 recoverable
2	The male gender segment is wasting PKR 6,485	Critical	PKR 6,485 recoverable
3	Meta has a campaign burning PKR 1,661 at zero conversions	Critical	PKR 1,661 recoverable
4	Meta has a ad set burning PKR 1,661 at zero conversions	Critical	PKR 1,661 recoverable
5	Meta CPM is critically above the B2B SaaS industry benchmark	High	PKR 11,636 recoverable

Money impact is shown only when the account data supports a reliable estimate. Other rows are still important business risks.

04

EVIDENCE

The evidence, finding by finding

Each finding shows what is happening, the business impact, supporting evidence, confidence, and the recommended fix.

The mobile app device segment is wasting PKR 7,687

What is happening: The mobile app device segment runs at **PKR 885** CPA vs a **PKR 336** platform baseline — **PKR 7,687** of that spend is excess cost above baseline efficiency.

Why it is happening: the audit found this pattern in the account data. Use the evidence below to confirm the driver before changing budgets.

Estimated business impact: **PKR 7,687** in this segment is recoverable by reducing or excluding it. Reallocate to segments performing at or below the **PKR 336** baseline CPA.

PKR 7,687 recoverable

EVIDENCE	VALUE
Spend	PKR 12,389
Reason	Worse than baseline
Segment	Mobile app
Sample note	Sufficient sample
Conversions	14

Expected outcome after fixing: spend should shift away from the flagged weakness and performance should move closer to the account baseline.

What this means for you: fixing this can recover **PKR 7,687 in the next comparable period.**

1. Review the mobile app device segment in the platform UI to confirm the underperformance.
2. Exclude or down bid the mobile app segment after confirming the trend on the next full reporting cycle.
3. Reallocate the recovered budget to segments at or below baseline CPA.

The male gender segment is wasting PKR 6,485

What is happening: The male gender segment runs at **PKR 799** CPA vs a **PKR 336** platform baseline — **PKR 6,485** of that spend is excess cost above baseline efficiency.

Why it is happening: the audit found this pattern in the account data. Use the evidence below to confirm the driver before changing budgets.

Estimated business impact: **PKR 6,485** in this segment is recoverable by reducing or excluding it. Reallocate to segments performing at or below the **PKR 336** baseline CPA.

PKR 6,485 recoverable

EVIDENCE	VALUE
Spend	PKR 11,188
Reason	Worse than baseline
Segment	Male
Sample note	Sufficient sample
Conversions	14

Expected outcome after fixing: spend should shift away from the flagged weakness and performance should move closer to the account baseline.

What this means for you: fixing this can recover **PKR 6,485 in the next comparable period.**

1. Review the male gender segment in the platform UI to confirm the underperformance.
2. Exclude or down bid the male segment after confirming the trend on the next full reporting cycle.
3. Reallocate the recovered budget to segments at or below baseline CPA.

Meta has a campaign burning PKR 1,661 at zero conversions

What is happening: The account average CPA of **PKR 336** hides a wide spread across campaigns. Kingdom Testing spent **PKR 1,661** with zero conversions against a **PKR 336** account baseline. By contrast, Pesh | WA | 23/5 runs at **PKR 133** — at or below baseline. Treating the account as uniformly inefficient (an across the board cut) would damage the healthy campaign while leaving the real offender untouched.

Why it is happening: the audit found this pattern in the account data. Use the evidence below to confirm the driver before changing budgets.

Estimated business impact: **PKR 1,661** is recoverable by bringing this campaign toward the **PKR 336** account baseline — without touching campaigns already at or below it.

EVIDENCE	VALUE
Confidence	High
Min sample passed	Yes

Expected outcome after fixing: spend should shift away from the flagged weakness and performance should move closer to the account baseline.

What this means for you: fixing this can recover **PKR 1,661 in the next comparable period.**

1. Isolate Kingdom Testing and diagnose its CPA driver — audience/targeting, landing page, or bidding — before changing account wide settings.
2. Protect and consider scaling Pesh | WA | 23/5 (**PKR 133** CPA); it is carrying the account.
3. Manage to per campaign CPA targets rather than a single blended account average.

Meta has a ad set burning PKR 1,661 at zero conversions

What is happening: The account average CPA of **PKR 336** hides a wide spread across ad sets. New Leads Ad Set spent **PKR 1,661** with zero conversions against a **PKR 336** account baseline. By contrast, New Leads Ad Set Copy runs at **PKR 133** — at or below baseline. Treating the account as uniformly inefficient (an across the board cut) would damage the healthy ad set while leaving the real offender untouched.

Why it is happening: the audit found this pattern in the account data. Use the evidence below to confirm the driver before changing budgets.

Estimated business impact: **PKR 1,661** is recoverable by bringing this ad set toward the **PKR 336** account baseline — without touching ad sets already at or below it.

EVIDENCE	VALUE
Level	Adset
Confidence	High
Min sample passed	Yes

Expected outcome after fixing: spend should shift away from the flagged weakness and performance should move closer to the account baseline.

What this means for you: fixing this can recover **PKR 1,661 in the next comparable period.**

1. Isolate New Leads Ad Set and diagnose its CPA driver — audience/targeting, landing page, or bidding — before changing account wide settings.
2. Protect and consider scaling New Leads Ad Set Copy (**PKR 133** CPA); it is carrying the account.
3. Manage to per ad set CPA targets rather than a single blended account average.

Meta CPM is critically above the B2B SaaS industry benchmark

What is happening: Your .00, which exceeds the danger threshold of **PKR 60** for B2B SaaS accounts. You are overpaying for impressions by an estimated **PKR 11,636** compared to benchmark level buying (**PKR 20** CPM target).

Why it is happening: the audit found this pattern in the account data. Use the evidence below to confirm the driver before changing budgets.

Estimated business impact: Overpaying an estimated **PKR 11,636** vs. benchmark CPM efficiency at your current impression volume.

PKR 11,636 recoverable within the affected spend pool.

EVIDENCE	VALUE
Total spend	PKR 12,428
Impressions	39,578

Expected outcome after fixing: spend should shift away from the flagged weakness and performance should move closer to the account baseline.

What this means for you: fixing this can recover **PKR 11,636** in the next comparable period.

1. Broaden targeting to access cheaper inventory — narrow audiences drive CPM spikes.
2. Test interest based and lookalike audiences alongside retargeting (retargeting pools carry premium CPMs).
3. Review campaign objective — conversion objectives have higher CPMs than traffic or reach objectives.
4. Audit ad set overlap — overlapping audiences bid against each other and inflate CPM.

What to do this week, in order

This sequence prioritizes business impact first, then confidence and ease of implementation.

ORDER	ACTION	EFFORT	EXPECTED RESULT
1	The mobile app device segment is wasting PKR 7,687: Review the mobile app device segment in the platform UI to confirm the underperformance.	~1 hour	PKR 7,687 recoverable
2	The male gender segment is wasting PKR 6,485: Review the male gender segment in the platform UI to confirm the underperformance.	~1 hour	PKR 6,485 recoverable
3	Meta has a campaign burning PKR 1,661 at zero conversions: Isolate Kingdom Testing and diagnose its CPA driver — audience/targeting, landing page, or bidding — before changing account wide settings.	~1 hour	PKR 1,661 recoverable
4	Meta has a ad set burning PKR 1,661 at zero conversions: Isolate New Leads Ad Set and diagnose its CPA driver — audience/targeting, landing page, or bidding — before changing account wide settings.	~1 hour	PKR 1,661 recoverable
5	Meta CPM is critically above the B2B SaaS industry benchmark: Broaden targeting to access cheaper inventory — narrow audiences drive CPM spikes.	Half day	PKR 11,636 recoverable
