

Audience Custom audience #2488177887755 is mis applied — strong in Display | BD

PKR 6,598 of Display | PK | Signals | Tightened | 6/8's spend is going to an audience that converts elsewhere but not here. Removing it from Display | PK | Signals | Tightened | 6/8 and rebuilding a campaign specific audience recovers that spend. is the clearest quantified opportunity in this audit.

EXECUTIVE SUMMARY

What this audit found

PKR 6,598 of Display | PK | Signals | Tightened | 6/8's spend is going to an audience that converts elsewhere but not here. Removing it from Display | PK | Signals | Tightened | 6/8 and rebuilding a campaign specific audience recovers that spend. is the single most important number in this audit.

Lead issue: Audience Custom audience #2488177887755 is mis applied — strong in Display | BD | Signals | Tightened | 6/6, broken in Display | PK | Signals | Tightened | 6/8. The same audience segment (Custom audience #2488177887755) drives **PKR 86** CPA in Display | BD | Signals | Tightened | 6/6 but runs at **PKR 1,081** CPA in Display | PK | Signals | Tightened | 6/8 — 12.6× its **PKR 86** CPA in Display | BD | Signals | Tightened | 6/6. An audience trained on one campaign's converting users does not transfer to a different market or funnel — this is the classic cause of a campaign's CPA collapsing while its click through rate stays healthy.

Why it matters: Findings are ranked by leverage — the most damaging issue leads (severity and root cause gravity first, then confidence and recoverable spend), not simply the biggest dollar figure.

Next move: Start with the first issue in this report, then re run the audit after the next full reporting cycle to measure the delta.

THIS PERIOD	PER QUARTER	ANNUALIZED
6,598	≈ 19,794	≈ 79,176
identified opportunity	if the pattern persists	directional projection

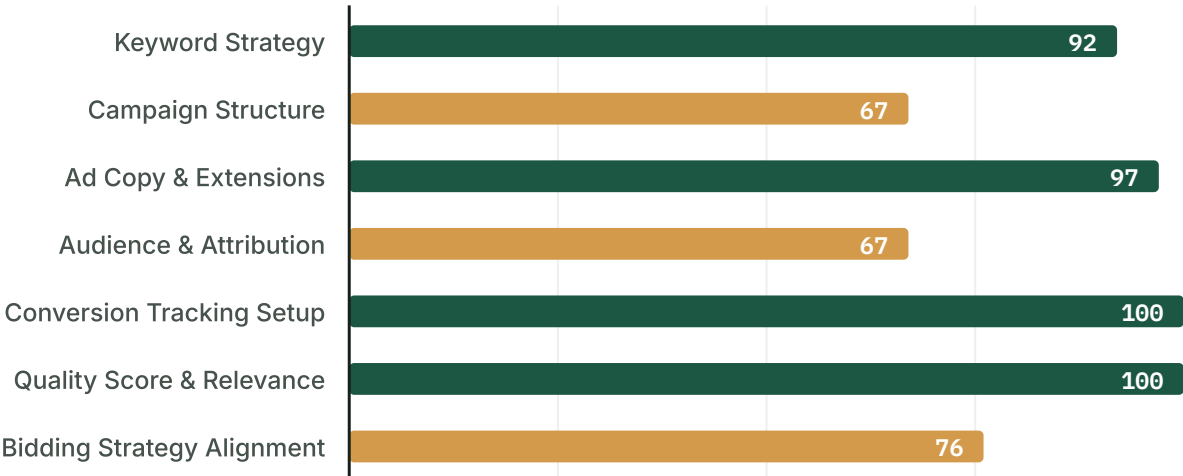

Projection multiplies the measured period impact and assumes spend and performance patterns remain stable.

01

HEALTH SCORE

Where the 74 comes from

The score breakdown shows which account areas are healthy and which areas generated findings.

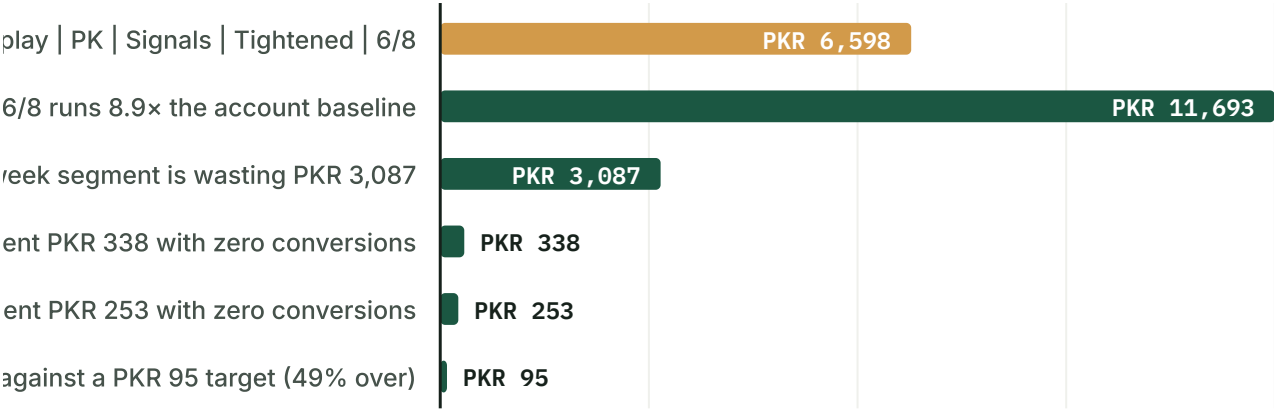

Scores below 85 are treated as pressure points.

02

MONEY MAP

Where the recoverable spend is concentrated

Only findings with measured financial evidence appear here. Structural risks stay out of this chart unless the engine can quantify them.

Measured recoverable spend by finding.

03

FINDINGS

9 findings, ranked by impact

Findings are ordered by leverage — severity and root cause gravity first, then confidence, then recoverable spend.

#	FINDING	SEVERITY	IMPACT
1	Audience Custom audience #2488177887755 is mis applied — strong in Display BD Signals Tightened 6/6, broken in Display PK Signals Tightened 6/8	Critical	PKR 6,598 recoverable
2	Google CPA varies sharply by campaign — Display PK Signals Tightened 6/8 runs 8.9× the account baseline	Critical	PKR 11,693 recoverable
3	The Thursday day of week segment is wasting PKR 3,087	Medium	PKR 3,087 recoverable
4	Desktop on PK Display 6/16 spent PKR 338 with zero conversions	Medium	PKR 338 recoverable
5	Desktop on Display PK Signals Tightened 6/8 spent PKR 253 with zero conversions	Medium	PKR 253 recoverable
6	Display Ind Signals Tightened 6/7 is missing its Target CPA — paying PKR 141 against a PKR 95 target (49% over)	Medium	PKR 95 recoverable
7	No Google brand campaign detected — brand traffic is unprotected	Medium	Brand risk
8	Many active Google keywords are getting zero impressions	Medium	Account hygiene risk

CAMPAIGN PERFORMANCE

Every campaign, with a verdict

Each campaign's own numbers against the account baseline (cost per result **PKR 138**) — so the diagnosis is grounded in per campaign performance, not a blended average.

CAMPAIGN	SPEND	RESULTS	COST / RESULT	VERDICT
Display BD 8/4 Broad No Tcpa (Old Proj)	PKR 29,587	199	PKR 149	Converting, but above the account average — room to tighten.
Display BD Signals Tightened 6/6	PKR 23,179	271	PKR 86	At or below the account's average cost — protect and scale this one.
Display Ind Signals Tightened 6/7	PKR 18,674	132	PKR 141	Converting, but above the account average — room to tighten.
Display PK Signals Tightened 6/8	PKR 9,794	8	PKR 1,224	Converting at 8.9× the account average — the main efficiency drag.
PK Display 6/16	PKR 6,044	22	PKR 275	Converting, but above the account average — room to tighten.
Display bd 02/06 Broad No Tcpa	PKR 2,254	17	PKR 133	At or below the account's average cost — protect and scale this one.
Display Ind Signals Tightened 6/7 #2	PKR 127	0	—	Limited data — monitor before acting.

Cost per result uses each campaign's own conversions; the verdict compares it to the account baseline.

EVIDENCE

The evidence, finding by finding

Each finding shows what is happening, the business impact, supporting evidence, confidence, and the recommended fix.

Audience Custom audience #2488177887755 is mis applied — strong in Display | BD | Signals | Tightened | 6/6, broken in Display | PK | Signals | Tightened | 6/8

What is happening: The same audience segment (Custom audience #2488177887755) drives **PKR 86** CPA in Display | BD | Signals | Tightened | 6/6 but runs at **PKR 1,081** CPA in Display | PK | Signals | Tightened | 6/8 — 12.6× its **PKR 86** CPA in Display | BD | Signals | Tightened | 6/6. An audience trained on one campaign's converting users does not transfer to a different market or funnel — this is the classic cause of a campaign's CPA collapsing while its click through rate stays healthy.

Why it is happening: The evidence below isolates the pattern in the account data. Confirm the specific driver — targeting, creative, bidding, or tracking — against these figures before changing budgets.

Estimated business impact: **PKR 6,598** of Display | PK | Signals | Tightened | 6/8's spend is going to an audience that converts elsewhere but not here. Removing it from Display | PK | Signals | Tightened | 6/8 and rebuilding a campaign specific audience recovers that spend.

EVIDENCE	VALUE
Confidence	High
Baseline cpa	PKR 138
Multiple vs best	13
Min sample passed	Yes

Expected outcome after fixing: spend should shift away from the flagged weakness and performance should move closer to the account baseline.

What this means for you: fixing this can recover **PKR 6,598 in the next comparable period.**

1. Remove audience Custom audience #2488177887755 from Display | PK | Signals | Tightened | 6/8 — it is a Display | BD | Signals | Tightened | 6/6 audience that does not map to this campaign's users.
2. Build a campaign specific audience for Display | PK | Signals | Tightened | 6/8 from its own market signals, then relearn on Maximize Conversions before adding a CPA target.
3. Keep Custom audience #2488177887755 running in Display | BD | Signals | Tightened | 6/6 where it performs, and isolate it from cross campaign overlap.

Google CPA varies sharply by campaign — Display | PK | Signals | Tightened | 6/8 runs 8.9× the account baseline

What is happening: The account average CPA of **PKR 138** hides a wide spread across campaigns. Display | PK | Signals | Tightened | 6/8 runs at **PKR 1,224** CPA — 8.9× the **PKR 138** account baseline. By contrast, Display | BD | Signals | Tightened | 6/6 runs at **PKR 86** — at or below baseline. Treating the account as uniformly inefficient (an across the board cut) would damage the healthy campaign while leaving the real offender untouched. The primary driver is geographic: spend is leaking to Pakistan, which converts well below the account baseline — so correcting location targeting (set targeting to physical "Presence", and exclude Pakistan if it is outside your intended market) is the root cause fix, not an across the board campaign cut.

Why it is happening: The evidence below isolates the pattern in the account data. Confirm the specific driver — targeting, creative, bidding, or tracking — against these figures before changing budgets.

Estimated business impact: **PKR 11,693** is recoverable by bringing these 2 campaigns toward the **PKR 138** account baseline — without touching campaigns already at or below it.

EVIDENCE	VALUE
Confidence	Medium
Min sample passed	No

Expected outcome after fixing: spend should shift away from the flagged weakness and performance should move closer to the account baseline.

What this means for you: fixing this can recover **PKR 11,693** in the next comparable period.

1. Isolate Display | PK | Signals | Tightened | 6/8 and diagnose its CPA driver — audience/targeting, landing page, or bidding — before changing account wide settings.
2. Protect and consider scaling Display | BD | Signals | Tightened | 6/6 (**PKR 86** CPA); it is carrying the account.
3. Manage to per campaign CPA targets rather than a single blended account average.
4. Review location settings: set targeting to "Presence" (people in your target locations), not "Presence or interest".

The Thursday day of week segment is wasting PKR 3,087

What is happening: The Thursday day of week segment runs at **PKR 180** CPA vs a **PKR 138** platform baseline — **PKR 3,087** of that spend is excess cost above baseline efficiency.

Why it is happening: This segment converts at a worse rate than the account baseline, so each result here costs more than it does elsewhere; the blended average hides the gap.

Estimated business impact: **PKR 3,087** in this segment is recoverable by reducing or excluding it. Reallocate to segments performing at or below the **PKR 138** baseline CPA.

PKR 3,087 recoverable

EVIDENCE	VALUE
Spend	PKR 13,172
Reason	Worse than baseline
Segment	Thursday
Sample note	Sufficient sample
Conversions	73

Expected outcome after fixing: spend should shift away from the flagged weakness and performance should move closer to the account baseline.

What this means for you: fixing this can recover **PKR 3,087 in the next comparable period.**

1. Review the Thursday day of week segment in the platform UI to confirm the underperformance.
2. Exclude or down bid the Thursday segment after confirming the trend on the next full reporting cycle.
3. Reallocate the recovered budget to segments at or below baseline CPA.

Desktop on PK Display 6/16 spent PKR 338 with zero conversions

What is happening: Within PK Display 6/16, the desktop device generated 140 clicks and **PKR 338** in spend with zero conversions. A device bid modifier concentrates budget on the devices that actually convert.

Why it is happening: This segment is taking real spend and clicks but returning no conversions, while the rest of the account converts at baseline — spend is being allocated here without the performance to justify it.

Estimated business impact: **PKR 338** is recoverable by applying a **100%** desktop bid modifier on PK Display 6/16.

Recoverable 100%

PKR 338 recoverable within the affected spend pool.

EVIDENCE	VALUE
Device	Desktop
Reason	Zero conversions
Confidence	High
Campaign cpa	PKR 275
Min sample passed	Yes

Expected outcome after fixing: spend should shift away from the flagged weakness and performance should move closer to the account baseline.

What this means for you: fixing this can recover **PKR 338 in the next comparable period.**

1. In PK Display 6/16, set a **100%** (exclude) bid modifier on desktop.
2. Re check device CPA after 7–10 days and tune the modifier toward the campaign's blended CPA.
3. Reallocate the freed budget to the best converting device.

Desktop on Display | PK | Signals | Tightened | 6/8 spent PKR 253 with zero conversions

What is happening: Within Display | PK | Signals | Tightened | 6/8, the desktop device generated 73 clicks and **PKR 253** in spend with zero conversions. A device bid modifier concentrates budget on the devices that actually convert.

Why it is happening: This segment is taking real spend and clicks but returning no conversions, while the rest of the account converts at baseline — spend is being allocated here without the performance to justify it.

Estimated business impact: **PKR 253** is recoverable by applying a **100%** desktop bid modifier on Display | PK | Signals | Tightened | 6/8.

Recoverable 100%

PKR 253 recoverable within the affected spend pool.

EVIDENCE	VALUE
Device	Desktop
Reason	Zero conversions
Confidence	High
Campaign cpa	PKR 1,224
Min sample passed	Yes

Expected outcome after fixing: spend should shift away from the flagged weakness and performance should move closer to the account baseline.

What this means for you: fixing this can recover **PKR 253 in the next comparable period.**

1. In Display | PK | Signals | Tightened | 6/8, set a **100%** (exclude) bid modifier on desktop.
2. Re check device CPA after 7–10 days and tune the modifier toward the campaign's blended CPA.
3. Reallocate the freed budget to the best converting device.

Display | Ind | Signals | Tightened | 6/7 is missing its Target CPA — paying PKR 141 against a PKR 95 target (49% over)

What is happening: Display | Ind | Signals | Tightened | 6/7 is on Target CPA bidding set to **PKR 95**, but actual cost per conversion is **PKR 141** — **49%** above the target on **PKR 18,674** of spend. When a tCPA target isn't holding, it's usually one of three things: the target is set below what the auction can realistically deliver (so Google throttles volume chasing it), conversion tracking lag is understating recent conversions, or recent target changes haven't finished relearning.

Why it is happening: The evidence below isolates the pattern in the account data. Confirm the specific driver — targeting, creative, bidding, or tracking — against these figures before changing budgets.

Estimated business impact: Closing the gap between the **PKR 95** target and the **PKR 141** actual brings cost per conversion back in line with the goal you've already set for this campaign.

PKR 95 recoverable

EVIDENCE	VALUE
Confidence	High
Min sample passed	Yes

Expected outcome after fixing: spend should shift away from the flagged weakness and performance should move closer to the account baseline.

What this means for you: fixing this can recover **PKR 95 in the next comparable period.**

1. Confirm the **PKR 95** target is realistic against this campaign's recent achieved CPA — raise it toward a reachable level if Google is under delivering to chase it.
2. Check conversion tracking for lag or under counting that would inflate measured CPA.
3. If the target was changed recently, allow 1–2 weeks of relearning before judging it.

What to do this week, in order

This sequence prioritizes business impact first, then confidence and ease of implementation.

ORDER	ACTION	EFFORT	EXPECTED RESULT
1	Audience Custom audience #2488177887755 is mis applied — strong in Display BD Signals Tightened 6/6, broken in Display PK Signals Tightened 6/8: Remove audience Custom audience #2488177887755 from Display PK Signals Tightened 6/8 — it is a Display BD Signals Tightened 6/6 audience that does not map to this campaign's users.	~1 hour	PKR 6,598 recoverable
2	Google CPA varies sharply by campaign — Display PK Signals Tightened 6/8 runs 8.9× the account baseline: Isolate Display PK Signals Tightened 6/8 and diagnose its CPA driver — audience/targeting, landing page, or bidding — before changing account wide settings.	Half day	PKR 11,693 recoverable
3	The Thursday day of week segment is wasting PKR 3,087: Review the Thursday day of week segment in the platform UI to confirm the underperformance.	~1 hour	PKR 3,087 recoverable
4	desktop on PK Display 6/16 spent PKR 338 with zero conversions: In PK Display 6/16, set a 100% (exclude) bid modifier on desktop.	~1 hour	PKR 338 recoverable
5	desktop on Display PK Signals Tightened 6/8 spent PKR 253 with zero conversions: In Display PK Signals Tightened 6/8, set a 100% (exclude) bid modifier on desktop.	~1 hour	PKR 253 recoverable
