EXECUTIVE SUMMARY

What this audit found

PKR 11,021 is recoverable by excluding or down bidding Pakistan and tightening location targeting to physical presence in your target markets. is the single most important number in this audit.

Lead issue: Pakistan runs at **PKR 753** CPA — well above the **PKR 140** account baseline. Pakistan runs at **PKR 753** CPA versus a **PKR 140** account baseline, on **PKR 13,548** of spend. Location targeting or a location of interest setting is letting budget flow to a market that does not convert efficiently.

Why it matters: Findings are ranked by recoverable spend/revenue, confidence, and implementation ease, not by severity label alone.

Next move: Start with the first issue in this report, then re run the audit after the next full reporting cycle to measure the delta.

THIS PERIOD 11,021 identified opportunity	PER QUARTER ≈ 33,063 if the pattern persists	ANNUALIZED ≈ 132,252 directional projection
--	---	--

Projection multiplies the measured period impact and assumes spend and performance patterns remain stable.

01

HEALTH SCORE

Where the 0 comes from

The score breakdown shows which account areas are healthy and which areas generated findings.

Scores below 85 are treated as pressure points.

02

MONEY MAP

Where the recoverable spend is concentrated

Only findings with measured financial evidence appear here. Structural risks stay out of this chart unless the engine can quantify them.

Measured recoverable spend by finding.

03

FINDINGS

8 findings, ranked by impact

Findings are ordered by measured recoverable spend or revenue first, then confidence, then ease of implementation.

#	FINDING	SEVERITY	IMPACT
1	Pakistan runs at PKR 753 CPA — well above the PKR 140 account baseline	High	PKR 11,021 recoverable
2	Google CPA varies sharply by campaign — Display PK Signals Tightened 6/8 runs 8.8× the account baseline	Critical	PKR 10,391 recoverable
3	Audience Custom audience #2488177887755 is mis applied — strong in Display BD Signals Tightened 6/6, broken in Display PK Signals Tightened 6/8	Critical	PKR 6,787 recoverable
4	The Thursday day of week segment is wasting PKR 3,491	Medium	PKR 3,491 recoverable
5	Desktop on Display PK Signals Tightened 6/8 spent PKR 234 with zero conversions	Medium	PKR 234 recoverable
6	Desktop on PK Display 6/16 spent PKR 217 with zero conversions	Medium	PKR 217 recoverable
7	No Google brand campaign detected — brand traffic is unprotected	Medium	Brand risk
8	Many active Google keywords are getting zero impressions	Medium	Account hygiene risk

Money impact is shown only when the account data supports a reliable estimate. Other rows are still important business risks.

EVIDENCE

The evidence, finding by finding

Each finding shows what is happening, the business impact, supporting evidence, confidence, and the recommended fix.

Pakistan runs at PKR 753 CPA — well above the PKR 140 account baseline

What is happening: Pakistan runs at **PKR 753** CPA versus a **PKR 140** account baseline, on **PKR 13,548** of spend. Location targeting or a location of interest setting is letting budget flow to a market that does not convert efficiently.

Why it is happening: the audit found this pattern in the account data. Use the evidence below to confirm the driver before changing budgets.

Estimated business impact: **PKR 11,021** is recoverable by excluding or down bidding Pakistan and tightening location targeting to physical presence in your target markets.

Recoverable 81.3%

Remaining 18.7%

PKR 11,021 recoverable within the affected spend pool.

EVIDENCE	VALUE
Clicks	4,403
Reason	Worse than baseline
Confidence	High
Conversions	18
Min sample passed	Yes

Expected outcome after fixing: spend should shift away from the flagged weakness and performance should move closer to the account baseline.

What this means for you: fixing this can recover **PKR 11,021 in the next comparable period.**

1. Review location settings: set targeting to "Presence" (people in your target locations), not "Presence or interest".
2. Add Pakistan as a location exclusion if it is outside your intended market.
3. Re check geo performance after a full reporting cycle and reallocate to converting markets.

Google CPA varies sharply by campaign — Display | PK | Signals | Tightened | 6/8 runs 8.8× the account baseline

What is happening: The account average CPA of **PKR 140** hides a wide spread across campaigns. Display | PK | Signals | Tightened | 6/8 runs at **PKR 1,233** CPA — 8.8× the **PKR 140** account baseline. By contrast, Display | BD | Signals | Tightened | 6/6 runs at **PKR 84** — at or below baseline. Treating the account as uniformly inefficient (an across the board cut) would damage the healthy campaign while leaving the real offender untouched.

Why it is happening: the audit found this pattern in the account data. Use the evidence below to confirm the driver before changing budgets.

Estimated business impact: **PKR 10,391** is recoverable by bringing these 2 campaigns toward the **PKR 140** account baseline — without touching campaigns already at or below it.

EVIDENCE	VALUE
Confidence	Medium
Min sample passed	No

Expected outcome after fixing: spend should shift away from the flagged weakness and performance should move closer to the account baseline.

What this means for you: fixing this can recover **PKR 10,391** in the next comparable period.

1. Isolate Display | PK | Signals | Tightened | 6/8 and diagnose its CPA driver — audience/targeting, landing page, or bidding — before changing account wide settings.
2. Protect and consider scaling Display | BD | Signals | Tightened | 6/6 (**PKR 84** CPA); it is carrying the account.
3. Manage to per campaign CPA targets rather than a single blended account average.

Audience Custom audience #2488177887755 is mis applied — strong in Display | BD | Signals | Tightened | 6/6, broken in Display | PK | Signals | Tightened | 6/8

What is happening: The same audience segment (Custom audience #2488177887755) drives **PKR 84** CPA in Display | BD | Signals | Tightened | 6/6 but runs at **PKR 1,110** CPA in Display | PK | Signals | Tightened | 6/8 — 13.2× its **PKR 84** CPA in Display | BD | Signals | Tightened | 6/6. An audience trained on one campaign's converting users does not transfer to a different market or funnel — this is the classic cause of a campaign's CPA collapsing while its click through rate stays healthy.

Why it is happening: the audit found this pattern in the account data. Use the evidence below to confirm the driver before changing budgets.

Estimated business impact: **PKR 6,787** of Display | PK | Signals | Tightened | 6/8's spend is going to an audience that converts elsewhere but not here. Removing it from Display | PK | Signals | Tightened | 6/8 and rebuilding a campaign specific audience recovers that spend.

EVIDENCE	VALUE
Confidence	High
Baseline cpa	PKR 140
Min sample passed	Yes

Expected outcome after fixing: spend should shift away from the flagged weakness and performance should move closer to the account baseline.

What this means for you: fixing this can recover **PKR 6,787** in the next comparable period.

1. Remove audience Custom audience #2488177887755 from Display | PK | Signals | Tightened | 6/8 — it is a Display | BD | Signals | Tightened | 6/6 audience that does not map to this campaign's users.
2. Build a campaign specific audience for Display | PK | Signals | Tightened | 6/8 from its own market signals, then relearn on Maximize Conversions before adding a CPA target.
3. Keep Custom audience #2488177887755 running in Display | BD | Signals | Tightened | 6/6 where it performs, and isolate it from cross campaign overlap.

The Thursday day of week segment is wasting PKR 3,491

What is happening: The Thursday day of week segment runs at **PKR 185** CPA vs a **PKR 140** platform baseline — **PKR 3,491** of that spend is excess cost above baseline efficiency.

Why it is happening: the audit found this pattern in the account data. Use the evidence below to confirm the driver before changing budgets.

Estimated business impact: **PKR 3,491** in this segment is recoverable by reducing or excluding it. Reallocate to segments performing at or below the **PKR 140** baseline CPA.

PKR 3,491 recoverable

EVIDENCE	VALUE
Spend	PKR 14,444
Reason	Worse than baseline
Segment	Thursday
Sample note	Sufficient sample
Conversions	78

Expected outcome after fixing: spend should shift away from the flagged weakness and performance should move closer to the account baseline.

What this means for you: fixing this can recover **PKR 3,491 in the next comparable period.**

1. Review the Thursday day of week segment in the platform UI to confirm the underperformance.
2. Exclude or down bid the Thursday segment after confirming the trend on the next full reporting cycle.
3. Reallocate the recovered budget to segments at or below baseline CPA.

Desktop on Display | PK | Signals | Tightened | 6/8 spent PKR 234 with zero conversions

What is happening: Within Display | PK | Signals | Tightened | 6/8, the desktop device generated 69 clicks and **PKR 234** in spend with zero conversions. A device bid modifier concentrates budget on the devices that actually convert.

Why it is happening: the audit found this pattern in the account data. Use the evidence below to confirm the driver before changing budgets.

Estimated business impact: **PKR 234** is recoverable by applying a **100%** desktop bid modifier on Display | PK | Signals | Tightened | 6/8.

Recoverable 100%

PKR 234 recoverable within the affected spend pool.

EVIDENCE	VALUE
Device	Desktop
Reason	Zero conversions
Confidence	High
Campaign cpa	PKR 1,233
Min sample passed	Yes

Expected outcome after fixing: spend should shift away from the flagged weakness and performance should move closer to the account baseline.

What this means for you: fixing this can recover **PKR 234 in the next comparable period.**

1. In Display | PK | Signals | Tightened | 6/8, set a **100%** (exclude) bid modifier on desktop.
2. Re check device CPA after 7–10 days and tune the modifier toward the campaign's blended CPA.
3. Reallocate the freed budget to the best converting device.

Desktop on PK Display 6/16 spent PKR 217 with zero conversions

What is happening: Within PK Display 6/16, the desktop device generated 75 clicks and **PKR 217** in spend with zero conversions. A device bid modifier concentrates budget on the devices that actually convert.

Why it is happening: the audit found this pattern in the account data. Use the evidence below to confirm the driver before changing budgets.

Estimated business impact: **PKR 217** is recoverable by applying a **100%** desktop bid modifier on PK Display 6/16.

Recoverable 100%

PKR 217 recoverable within the affected spend pool.

EVIDENCE	VALUE
Device	Desktop
Reason	Zero conversions
Confidence	High
Campaign cpa	PKR 306
Min sample passed	Yes

Expected outcome after fixing: spend should shift away from the flagged weakness and performance should move closer to the account baseline.

What this means for you: fixing this can recover **PKR 217 in the next comparable period.**

1. In PK Display 6/16, set a **100%** (exclude) bid modifier on desktop.
2. Re check device CPA after 7–10 days and tune the modifier toward the campaign's blended CPA.
3. Reallocate the freed budget to the best converting device.

How this account compares

Benchmark comparisons appear only when peer, historical, or industry facts are available for this audit.

Matched peer account 'update' (same platform, B2B SaaS, similar spend band): This account's CPA is **4.1%** better than the peer, but its CTR is weaker — **6.46%** vs **6.99%** (about **8.4%** lower), the strongest gap on the weak side. CPC is **4.7%** better and **CPM 12.3%** better; spend is **33.1%** higher and conversions **38.8%** higher. Confidence high.

Account CPA baseline: Baseline **PKR 140**. Best campaign Display | BD | Signals | Tightened | 6/6 at **PKR 84** (0.6×); worst Display | PK | Signals | Tightened | 6/8 at **PKR 1,233** (8.8×); Pakistan market at **PKR 753** (5.4× baseline).

Brand campaign benchmark: Industry pattern shows brand campaigns typically achieve 5–10× better CTR and ROAS than non brand; this account has no brand campaign across its 29 campaigns.

AP

ACTION PLAN

What to do this week, in order

This sequence prioritizes business impact first, then confidence and ease of implementation.

ORDER	ACTION	EFFORT	EXPECTED RESULT
1	Pakistan runs at PKR 753 CPA — well above the PKR 140 account baseline: Review location settings: set targeting to "Presence" (people in your target locations), not "Presence or interest".	~1 hour	PKR 11,021 recoverable
2	Google CPA varies sharply by campaign — Display PK Signals Tightened 6/8 runs 8.8× the account baseline: Isolate Display PK Signals Tightened 6/8 and diagnose its CPA driver — audience/targeting, landing page, or bidding — before changing account wide settings.	~1 hour	PKR 10,391 recoverable
3	Audience Custom audience #2488177887755 is mis applied — strong in Display BD Signals Tightened 6/6, broken in Display PK Signals Tightened 6/8: Remove audience Custom audience #2488177887755 from Display PK Signals Tightened 6/8 — it is a Display BD Signals Tightened 6/6 audience that does not map to this campaign's users.	~1 hour	PKR 6,787 recoverable
4	The Thursday day of week segment is wasting PKR 3,491: Review the Thursday day of week segment in the platform UI to confirm the underperformance.	~1 hour	PKR 3,491 recoverable
5	desktop on Display PK Signals Tightened 6/8 spent PKR 234 with zero conversions: In Display PK Signals Tightened 6/8, set a 100% (exclude) bid modifier on desktop.	~1 hour	PKR 234 recoverable
