EXECUTIVE SUMMARY

What this audit found

PKR 8,060 is recoverable by bringing this campaign toward the **PKR 40** account baseline — without touching campaigns already at or below it. is the single most important number in this audit.

Lead issue: Meta CPA varies sharply by campaign — New Leads Campaign runs 26.4× the account baseline. The account average CPA of **PKR 40** hides a wide spread across campaigns. New Leads Campaign runs at **PKR 1,047** CPA — 26.4× the **PKR 40** account baseline.

Why it matters: Findings are ranked by leverage — the most damaging issue leads (severity and root cause gravity first, then confidence and recoverable spend), not simply the biggest dollar figure.

Next move: Start with the first issue in this report, then re run the audit after the next full reporting cycle to measure the delta.

THIS PERIOD 8,060 identified opportunity	PER QUARTER ≈ 24,180 if the pattern persists	ANNUALIZED ≈ 96,720 directional projection
--	--	--

Projection multiplies the measured period impact and assumes spend and performance patterns remain stable.

01

HEALTH SCORE

Where the 70 comes from

The score breakdown shows which account areas are healthy and which areas generated findings.

Scores below 85 are treated as pressure points.

02

MONEY MAP

Where the recoverable spend is concentrated

Only findings with measured financial evidence appear here. Structural risks stay out of this chart unless the engine can quantify them.

Measured recoverable spend by finding.

FINDINGS

6 findings, ranked by impact

Findings are ordered by leverage — severity and root cause gravity first, then confidence, then recoverable spend.

#	FINDING	SEVERITY	IMPACT
1	Meta CPA varies sharply by campaign — New Leads Campaign runs 26.4× the account baseline	Critical	PKR 8,060 recoverable
2	Meta CPA varies sharply by ad set — New Leads Ad Set runs 26.4× the account baseline	Critical	PKR 8,060 recoverable
3	Meta CPM is critically above the B2B SaaS industry benchmark	High	PKR 15,094 recoverable
4	.5% below a similar account in your portfolio	High	Needs review
5	The 11:00:00 11:59:59 hour segment is wasting PKR 288	Medium	PKR 288 recoverable
6	Paused Meta ad sets still have budgets assigned	Medium	Account hygiene risk

Money impact is shown only when the account data supports a reliable estimate. Other rows are still important business risks.

EVIDENCE

The evidence, finding by finding

Each finding shows what is happening, the business impact, supporting evidence, confidence, and the recommended fix.

Meta CPA varies sharply by campaign — New Leads Campaign runs 26.4× the account baseline

What is happening: The account average CPA of **PKR 40** hides a wide spread across campaigns. New Leads Campaign runs at **PKR 1,047** CPA — 26.4× the **PKR 40** account baseline.

Why it is happening: the audit found this pattern in the account data. Use the evidence below to confirm the driver before changing budgets.

Estimated business impact: **PKR 8,060** is recoverable by bringing this campaign toward the **PKR 40** account baseline — without touching campaigns already at or below it.

EVIDENCE	VALUE
Best cpa	PKR 20
Confidence	Medium
Min sample passed	No

Expected outcome after fixing: spend should shift away from the flagged weakness and performance should move closer to the account baseline.

What this means for you: fixing this can recover **PKR 8,060 in the next comparable period.**

1. Isolate New Leads Campaign and diagnose its CPA driver — audience/targeting, landing page, or bidding — before changing account wide settings.
2. Identify the best performing campaign and shift budget toward it.
3. Manage to per campaign CPA targets rather than a single blended account average.

Meta CPA varies sharply by ad set — New Leads Ad Set runs 26.4× the account baseline

What is happening: The account average CPA of **PKR 40** hides a wide spread across ad sets. New Leads Ad Set runs at **PKR 1,047** CPA — 26.4× the **PKR 40** account baseline.

Why it is happening: the audit found this pattern in the account data. Use the evidence below to confirm the driver before changing budgets.

Estimated business impact: **PKR 8,060** is recoverable by bringing this ad set toward the **PKR 40** account baseline — without touching ad sets already at or below it.

EVIDENCE	VALUE
Level	Adset
Best cpa	PKR 20
Confidence	Medium
Min sample passed	No

Expected outcome after fixing: spend should shift away from the flagged weakness and performance should move closer to the account baseline.

What this means for you: fixing this can recover **PKR 8,060 in the next comparable period.**

1. Isolate New Leads Ad Set and diagnose its CPA driver — audience/targeting, landing page, or bidding — before changing account wide settings.
2. Identify the best performing ad set and shift budget toward it.
3. Manage to per ad set CPA targets rather than a single blended account average.

Meta CPM is critically above the B2B SaaS industry benchmark

What is happening: Your .09, which exceeds the danger threshold of **PKR 60** for B2B SaaS accounts. You are overpaying for impressions by an estimated **PKR 15,094** compared to benchmark level buying (**PKR 20** CPM target).

Why it is happening: the audit found this pattern in the account data. Use the evidence below to confirm the driver before changing budgets.

Estimated business impact: Overpaying an estimated **PKR 15,094** vs. benchmark CPM efficiency at your current impression volume.

Recoverable 89.7%

Remaining

PKR 15,094 recoverable within the affected spend pool.

EVIDENCE	VALUE
Total spend	PKR 16,818
Impressions	86,206

Expected outcome after fixing: spend should shift away from the flagged weakness and performance should move closer to the account baseline.

What this means for you: fixing this can recover **PKR 15,094 in the next comparable period.**

1. Broaden targeting to access cheaper inventory — narrow audiences drive CPM spikes.
2. Test interest based and lookalike audiences alongside retargeting (retargeting pools carry premium CPMs).
3. Review campaign objective — conversion objectives have higher CPMs than traffic or reach objectives.
4. Audit ad set overlap — overlapping audiences bid against each other and inflate CPM.

.5% below a similar account in your portfolio

What is happening: This account's CTR is **4.581%** vs **8.176%** on new (same platform, same business type). Same platform and comparable profile — the gap points to creative/relevance, not platform pricing.

Why it is happening: the audit found this pattern in the account data. Use the evidence below to confirm the driver before changing budgets.

Estimated business impact: Closing the CTR gap to your own better performing Meta account (**8.176%**) would lower CPC and CPA at the same spend. The winning account is the template — copy its hook, format, and offer framing.

78.5% gap

EVIDENCE	VALUE
Ctr gap pct	78.5%
Confidence	High

Expected outcome after fixing: spend should shift away from the flagged weakness and performance should move closer to the account baseline.

What this means for you: fixing this removes account drag before it turns into measurable waste.

1. Pull the top creatives from new and adapt their hooks/format here.
2. A/B test the adapted creative against the current best ad.
3. Re audit after 7 days to confirm the CTR gap is closing.

The 11:00:00 11:59:59 hour segment is wasting PKR 288

What is happening: The 11:00:00 11:59:59 hour segment runs at **PKR 51** CPA vs a **PKR 40** platform baseline — **PKR 288** of that spend is excess cost above baseline efficiency.

Why it is happening: the audit found this pattern in the account data. Use the evidence below to confirm the driver before changing budgets.

Estimated business impact: **PKR 288** in this segment is recoverable by reducing or excluding it. Reallocate to segments performing at or below the **PKR 40** baseline CPA.

PKR 288 recoverable

EVIDENCE	VALUE
Spend	PKR 1,280
Reason	Worse than baseline
Segment	11:00:00 11:59:59
Sample note	Sufficient sample
Conversions	25

Expected outcome after fixing: spend should shift away from the flagged weakness and performance should move closer to the account baseline.

What this means for you: fixing this can recover **PKR 288 in the next comparable period.**

1. Review the 11:00:00 11:59:59 hour segment in the platform UI to confirm the underperformance.
2. Exclude or down bid the 11:00:00 11:59:59 segment after confirming the trend on the next full reporting cycle.
3. Reallocate the recovered budget to segments at or below baseline CPA.

Paused Meta ad sets still have budgets assigned

What is happening: Paused ad sets with daily/lifetime budgets often confuse pacing reviews and may be re-enabled accidentally with stale targeting.

Why it is happening: the audit found this pattern in the account data. Use the evidence below to confirm the driver before changing budgets.

Estimated business impact: Account hygiene and budget pacing decisions degrade.

EVIDENCE	VALUE
Paused ad sets with budget	PKR 2

Expected outcome after fixing: spend should shift away from the flagged weakness and performance should move closer to the account baseline.

What this means for you: fixing this removes account drag before it turns into measurable waste.

1. Archive paused ad sets you don't intend to relaunch.
2. For ad sets reserved for relaunch, document why budget is retained.
