EXECUTIVE SUMMARY

What this audit found

\$206 is the single most important number in this audit.

Lead issue: Seg waste. \$206

Why it matters: Findings are ranked by leverage — the most damaging issue leads (severity and root cause gravity first, then confidence and recoverable spend), not simply the biggest dollar figure.

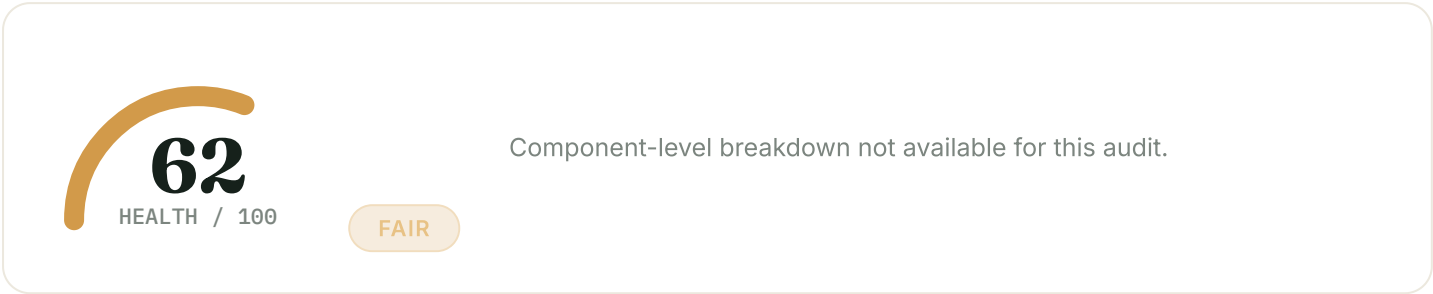

Next move: Start with the first issue in this report, then re run the audit after the next full reporting cycle to measure the delta.

THIS PERIOD 206 identified opportunity	PER QUARTER ≈ 618 if the pattern persists	ANNUALIZED ≈ 2,472 directional projection
---	--	--

Projection multiplies the measured period impact and assumes spend and performance patterns remain stable.

Where the 62 comes from

The audit has an overall health score, but no reliable component level breakdown for this run.
